Safety & Vulnerability Issues

Sustainability

PROPOSAL

Multi-site access management platform for temporary and permanent users.
Can be deployed for physical access applications (sites) or virtual access solutions (unlock machine or equipment for use, for ex.).

SOLUTION

SaaS platform, integrated with the top Access Control leaders systems.

DIFFERENTIAL

Friendly, simple, and intuitive interface for invite and visitor register.
ID Card authenticity verification (when available, Brasil ok).
Fully contactless experience (**HID Mobile Access®** embedded).
Wallet Integration.

GLOBAL PASS

**GLOBAL PASS**

Reduces the human resources demand in buildings receptions.

CONTACTLESS &
## FOCUSED IN CUSTOMER EXPERIENCE

- Self-registration, fast and automatic approval workflow.
- Secure access identity validation - matching ID with certificated data-base org (when available).
- Cloud-based system.
- Auditing and reporting tools.
- Allows customers to standardize and enforce security policies according to their business.
- Easy and quick installation – local gateway for integration with existing Access Control System.
- Cost Reduction – less receptionist positions required.

INTERFACE | **GLOBAL PASS**

GLOBAL PASS

WORKFLOW I **GLOBAL PASS | HID MOBILE ACCESS**

INVITATION

The client sends the invitation to visitor, for a specific and limited period of time.

SELF REGISTRATION

Visitor receive invite and complete registration requirements. Information and ID card are verified before credential assignment.

BRIDGE I LOCAL AND CLOUD CONTROL

Global Pass Cloud system checks site access control policies and automatically approves or ask for approval from authorized client supervisor.

RECEPTION

If approved, access is granted for the requested period, and visitor receives access credentials.

If denied, applicant receives an instant notification in the app explaining the reason.

PHISICAL ACCESS

Once authorized, credential details and rules are sent to local gateway. Global Pass sends the information to Access Control System, and visitor receives the fast-pass Mobile Access credential.
